Biosketch:

Dr. David Ross is the Director of the Virginia Institute of Neuropsychiatry, an outpatient clinic specializing in treatment of patients traumatic brain injury and other neuropsychiatric disorders.

Also he is the CEO of NeuroGage LLC, which produces NeuroGage[®], breakthrough software for measuring MRI brain volume change over time.

And he is Clinical Assistant Professor at Virginia Commonwealth University.

He is board-certified in 3 areas:

- (1) General Psychiatry
- (2) Neuropsychiatry; and
- (3) Brain Injury Medicine.

Since 2010, he and his colleagues have done pioneering work with NeuroQuant[®], FDA-cleared software for measuring MRI brain. As part of this, they developed NeuroGage[®], the only commercially available software for measuring brain volume change over time.
