Joel Ira Franck MD FAANS was raised in New York City. He attended the Bronx High School of Science and then went on to graduate from MIT in three years majoring in Life Sciences and Physics. Dr. Franck was heavily involved in advanced mainframe computer programming at the Central Intelligence Agency (being recognized for his originality in Scientific Intelligence), MIT Draper Laboratories, IBM, and the Insurance Rating Board. He then spent two years as a Graduate Fellow at the Rockefeller University in NYC (which has generated over 40 Nobel Laureates), studying Neurophysiology, and then went on to earn his Medical Degree at Yale University. Dr. Franck was presented the Mosby Award for Scientific Research for his original discoveries of the mechanisms of repair of the adult brain, recently applied to human neurosurgery. After completing seven years of Residency training in Neurosurgery at the Upstate Medical Center in Syracuse, New York, Dr. Franck established his private practice in Neurosurgery in Maine in 1986, and was awarded national Board Certification in Neurological Surgery. He then migrated to warmer weather in 2007, accepting employment at the Bay Medical Center in Panama City, Florida. In May of 2015, Dr. Franck relocated to Tampa to focus on his deep interest in his original developments in the Neurosurgical treatment of the post-whiplash Cranio-Cervical Syndrome and Intractable Migraine Headaches. Utilizing advanced image guided surgical technology, Dr Franck has successfully treated over 135 patients from 25 states, Canada, Europe and the Middle East with an outpatient C1-C2 fusion and microcraniectomy, resulting in resolution of intractable Migraine Headaches and Brain Fog. He continues to expand his series of over 4,500 anterior cervical fusions and total disc replacements. Having lectured at many venues the United States, the Caribbean, Israel, and Europe, Dr. Franck has over 80 publications and presentations, has had 14 US and International patients, and been the recipient of two National Biotechnology Gold Medals (for his developments in frameless stereotactic surgery and deep brain

stimulation). Dr. Franck is extremely proud of his close association with both the Legal and Chiropractic communities. He has lectured at major legal conferences, including the Catastrophic Care Society Annual Meeting, and been involved in over 1000 legal proceedings, including many successful trials serving as an expert witness for patients who were victims of automobile collisions.
