

Mark D. Herbst, M.D., Ph.D.

3990 Central Avenue

St. Petersburg, FL 33711

mdherbst@independent-dr.com

(727) 327-5006

Dr. Herbst is an M.D. board certified radiologist from St. Petersburg, Florida with a Ph.D. in physical chemistry who completed a fellowship in MRI. He is a nationally known expert in MRI, but he reads all kinds of medical images in his clinical practice, including x-rays, CT scans, ultrasounds, and nuclear medicine scans, specializing in musculoskeletal radiology and neuroradiology. He is a senior member of the American Society of Neuroradiology.

Dr. Herbst teaches MRI physics to technologists at St. Petersburg College and radiology to medical students from Lake Erie College of Osteopathic Medicine in Bradenton, Florida, Edward Via College of Osteopathic Medicine in Spartanburg, South Carolina, and Nova Southeastern College of Osteopathic Medicine in Ft. Lauderdale, Florida.

Dr. Herbst also lectures to physicians, attorneys, and insurance case managers around the country about radiology subjects such as MRI, radiology errors, disc herniations, and advanced imaging of brain injury.

Attorneys from the United States and Canada send medical images to Dr. Herbst for his unbiased review. As a pre-trial consultant, he tells the attorneys what the images show and perhaps just as important, what they do not show, which helps attorneys decide how to move forward with their malpractice or personal injury cases.
